Data Analyst with a strong capacity for **process automation**, **problem-solving**, and **data lifecycle management**. Expert in transitioning information from **legacy sources** (flat files) to modern, **scalable architectures**. Specialist in developing **ETL pipelines** using **SQL and Python (Pandas)**, with technical knowledge in **Cloud Data Warehouse** solutions such as **BigQuery** for processing large data volumes. I possess a high learning curve for new cloud technologies (**GCP/AWS**) and a rigorous focus on **data integrity** and **basic cybersecurity**. Proven experience transforming complex records into **automated reports** and **strategic KPIs** that optimize business decision-making.

EXPERIENCE

LARING SA, Ciudad Autónoma de Buenos Aires: **Data Analyst**

NOV 2024-PRESENT

- **Data Extraction & Analysis:** Developed advanced **SQL** queries (**Joins, CTEs, Window Functions**) to derive actionable insights from large datasets.
- **Structural Optimization:** Led the restructuring and normalization of relational database tables, enhancing data integrity and reducing redundancy.
- **Python Automation:** Developed **Python** scripts (**Pandas, NumPy**) for data cleaning, transformation, and loading (**ETL**), achieving significant optimization in processing times.
- **Visualization & Metrics:** Designed dashboards and periodic reports to track critical **KPIs**, enabling data-driven decision-making for management.

COLORFLEX, Provincia de Buenos Aires: **Data Analyst/Architect**

AUG 2024-NOV 2024

- **Data Architecture Design:** Created and developed a relational **SQL** database from scratch for inventory, sales, and supplier management, applying normalization rules to ensure data integrity and consistency.

MENÚ LIBRE, Ciudad Autónoma de Buenos Aires: **Data Analyst**

JUL 2023-JUN 2024

- **Retention & Engagement Metrics:** Defined and monitored key **KPIs** for platform usage, identifying peak traffic periods and optimizing decision-making for local marketing campaigns.
- **Data Infrastructure Migration:** Led the data migration of menus and catalogs from semi-structured files (**JSON/Excel**) to a centralized relational **SQL** database, ensuring consistency across more than 2,000 records.

SKILLS

Data Analyst - **Advanced**
Data Visualization / BI - **Advanced**
Data Cleaning - **Advanced**
Microsoft Excel - **Advanced**
SQL - **Advanced**
Python - **Advanced**
Google Cloud Platform - **Intermediate**
Amazon Web Services - **Basic**
Microsoft Azure - **Intermediate**

STRENGTHS

Analytical and Logical Thinking.
Problem-Solving.
Attention to Detail.
Time Management.
Teamwork.
Adaptability.
Fast Learning.

LANGUAGES

English- **B2 Upper Intermediate**
Spanish - **Native**
Italian - **A2 Elementary**
Portuguese - **A2 Elementary**
